COMPANY

About us

WE HELP OEMS AND OWNERS ACHIEVE THEIR OPERATIONAL GOALS FOR PERFORMANCE AND MAINTENANCE

Since 1955, Sky Climber, LLC has been serving work-at-height industries around the world as a leading manufacturer of suspended access equipment. For more than 60 years, Sky Climber has built a culture focused on safety, quality, responsibility, cooperation, excellence and people. These are the pillars of every Sky Climber business.

Sky Climber Renewables is built on the same fundamentals. It is these key elements that we continuously cultivate to sustain our business and deliver the best possible products and services.

OUR MISSION

Sky Climber Renewables is committed to helping grow and sustain renewable energy and to maintaining a healthy, inspiring and enduring workplace for its employees and their families.

OUR VISION

Our mission is simple, to be the most respected service company in renewable energy and to be known for delivering the greatest value, employing the best overall talent and caring the most about the customer experience.

The Value of Our Company

Our growth in Renewable Energy speaks for itself. There is a reason why we are a trusted independent service provider to the industry's largest OEMs and Owners.

1

Depth in Resources

Sky Climber Renewables employs more than 300 field service technicians that are trained in multiple competencies. We are also the only ISP that manufactures our own suspended access equipment. It is these unique capabilities that offer our clients greater availability, response time and overall value.

2

Longevity & Experience

We have been serving the renewable energy market for more than 10 years. Our parent company (Sky Climber, LLC) has been in business for more than 60 years. We have logged over 1 Million service hours and more than 750 different projects since founded in 2007.

3

Cost Effective Solutions

Part of our mission as a business is to deliver great value to our customers. We accomplish this by approaching every job with the most cost effective solution, while never sacrificing safety or quality. We focus on delivering great service at a great price that leaves clients feeling that they made the best choice at the end of the job.

HISTORY

The company history

Starting with a simple need in the market, to becoming an industry leader.

Sky Climber Renewables, formally Sky Climber Wind Solutions, began as a niche service company delivering suspended access solutions to the wind industry as an alternative to cranes. Today, we are an industry leading ISP, working with the largest OEMs and Owners in the world.

The company was established.

Sky Climber Renewables, formally Sky Climber Wind Solutions, began as a niche service company (a division of Sky Climber, LLC) providing suspended access solutions to the wind industry. Sky Climber, LLC has been a leading manufacturer of suspended access solutions since 1955.

Recognized as leader in suspended access

After just two years in business, Sky Climber Wind Solutions gained global recognition as a leader in suspended access solutions for wind turbine maintenance. This success and credibility motivated clients to suggest we offer services to compliment our wind turbine blade and tower platform systems. This was the foundation to our future in Renewable Energy.

Develop composite service program

In 2010, we developed our composite service program as an addition to our access and cleaning services. We sought to develop a program that was best-in-class and designed specifically for field repairs and maintenance. Our teams are trained in accordance with the ACMA (American Composites Manufacturers Association). Today, our field staff consists of more than 85 certified composite specialists.

10 years of performance and still counting

2011

Begin service work and open Canadian office

After successfully implementing a blade service program, we began offering scheduled & unscheduled service support to OEMs.

Technician development and technical training provided us the opportunity to support OEMs with maintenance and new installations. 2011 also marked the opening of services in Canada with an office in Goderich, Ontario.

2013

Now offering a complete menu of services

Now offering a complete menu of services, Sky Climber Wind Solutions was positioned to partner with more OEMs and Owners throughout North America, resulting in significant growth year-over-year.

2016

One of the largest ISPs in North America

Today, Sky Climber Renewables is one of the largest independent service providers in North America. We complete more than 250 projects annually, employ more than 340 people and are a preferred service provider to some of the largest renewable energy companies in the world.

OUR SERVICES

What we do

**DELIVER A FULL MENU OF SERVICES
ACROSS MULTIPLE BRANDS
ANYWHERE IN NORTH AMERICA**

Rotor Maintenance

Sky Climber Renewables composite program is second to none. Our staff of more than 85 certified composite specialists represent an average of 5 years experience in the wind industry. Each technician completes a minimum 80 hours of composites training in accordance with ACMA standards.

Drive Train Maintenance

Our staff of more than 175 service technicians represent an average of 3 years of wind service experience. Technicians are trained across multiple wind turbine platforms performing scheduled/unscheduled service, commissioning, QA/QC, retrofits and more.

Control Systems Maintenance

Control systems are an integral part of turbine operation and performance. Our teams are available to perform troubleshooting, replacements, upgrades and more.

Why Choose us?

Sky Climber Renewables provides its customers the greatest value as an ISP by delivering a complete menu of services, depth in resources and competitive pricing. We hire the best talent and develop our employees to ensure we exceed expectations on every project. We stand behind our service and we work diligently to be the best when it comes to safety, quality and customer experience.

Our customers become our partners. We take time to understand their needs and ensure that we do everything possible to facilitate cost effective solutions that will meet their unique goals and objectives.

Staff Augmentation

Leverage our depth in resources to execute a large scale campaign or offset your peaks in seasonal maintenance. Our staff of more than 300 field employees will ensure you meet your maintenance objectives.

Platform/Rope Access Solutions

Sky Climber pioneered suspended access solutions for the wind industry. Our blade and tower platform solutions offer the most efficient approach to up-tower maintenance. Our rope access specialists are also available to address difficult to reach areas of the turbine.

NEW

Fabrication

Our 80,000 sqft facility is equipped with state-of-the-art technology, offering 3D & 2D Laser Cutting, Welding and Forming. This division of Sky Climber is fully equipped to meet your project needs, including in-house engineering and AWS certified welders and inspectors.

THE CLIENTS

Clients we have served

***Our clients become our partners.
Their goals and objectives are our
top priority.***

We know our clients have many choices when deciding on an ISP or contractor to support their project. That's why we work closely with our clients to understand how we can best support them and ensure we meet their project goals and objectives.

What they think about us.

"It's great to work with a service provider that follows through with the mindset of going the extra mile"

Client feedback drives our business in all aspects. Whether it be safety, efficiency, quality or customer service, we measure our performance and work hard at delivering the best to our customers each and every time we interact.

JJ Davis
Regional Manager
Kruger Energy

"We enjoy working with Sky Climber Wind because they operate safely and competently. They brought value to the table when discussing blade maintenance and extending the life and performance of our blades."

Mike Kranz
Mid-West Regional Manager
EDF Renewable Energy

"When it comes to advanced blade repair, we trust Sky Climber to deliver quality service. Their up-tower platform systems are also a great tool for our teams to work safely and efficiently."

Farid El-Ejel
Project Manager
Siemens

"When Sky Climber Wind Solutions is mentioned in our internal discussions the immediate response to categorize the team is punctual, professional, proactive and positive. I am truly impressed with their ability to deliver services in a timely fashion. They are subject matter experts in what they do. It's great to work with a service provider that follows through with the mind-set of going the extra mile. Their enthusiasm is genuine and their results are measurable. Our customers and stakeholders are always satisfied with end results."
